## CERTIFICATE REGARDING NON-APPLICABILITY OF PHYTOSANITARY CERTIFICATE

We certify that our wood based products, produced according to European Standards (EN), are subject to heat and pressure treatment during the manufacturing process.

Moreover, the presence of resins polymerized at high temperatures (240°C) and pressure (30 kg/cm<sup>2</sup>) during the process prevents the existence of insects in the material.

According to guideline for application the IPPC Standards ISPM Nr. 15 "Guideline for provision of wood packing material to International Trade" PART A "Packing material for export" these materials, boards and packing, which are subject to a heat treatment during the manufacturing process, do not need phytosanitary certificate.
